Hub Bound Travel Data Report 2017 New York Metropolitan Transportation Council

August 2019

Disclaimer:

The preparation of this report has been funded through the U.S. Department of Transportation's Federal Transit Administration and Federal Highway Administration.

This document is disseminated under the sponsorship of the New York Metropolitan Transportation Council in the interest of information exchange. The contents of this report reflect the views of the authors who are responsible for the facts and accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the Federal Transit Administration, the Federal Highway Administration or the State of New York. This report does not constitute a standard, specification or regulation.

This report, "Hub Bound Travel Data Report 2017", was funded through the New York Metropolitan Transportation Council Project Data Collection for the NYMTC's New York Best Practice Model (NYBPM) and required Management System PTCS17D00.E02 in the 2017-2018 Unified Planning Work Program, which was funded through matching grants from the Federal Transit Administration (CFDA 20.505) and from the Federal Highway Administration (CFDA 20.205).

Types of Rapid Transit Rail Abbreviations:

IRT

The **Interborough Rapid Transit Company (IRT)** was the private operator of the original underground New York City Subway line that opened in 1904, as well as earlier elevated railways and additional rapid transit lines in New York City. The IRT was purchased by New York City in June 1940. The former IRT lines (the numbered routes in the current subway system) are now the A Division or IRT Division of the New York City Subway.

IND

The **Independent Subway System (IND)**, formerly known as the **Independent City-Owned Subway System** or the **Independent City-Owned Rapid Transit Railroad**, was a rapid transit rail system in New York City that is now part of the New York City Subway. It was first constructed as the Eighth Avenue Line in Manhattan in 1932. One of three rail networks that became part of the modern New York City subway, the IND was intended to be fully owned and operated by the municipal government, in contrast to the privately operated or jointly-funded Interborough Rapid Transit Company (IRT) and Brooklyn-Manhattan Transit Corporation (BMT) companies. It was merged with these two networks in 1940.

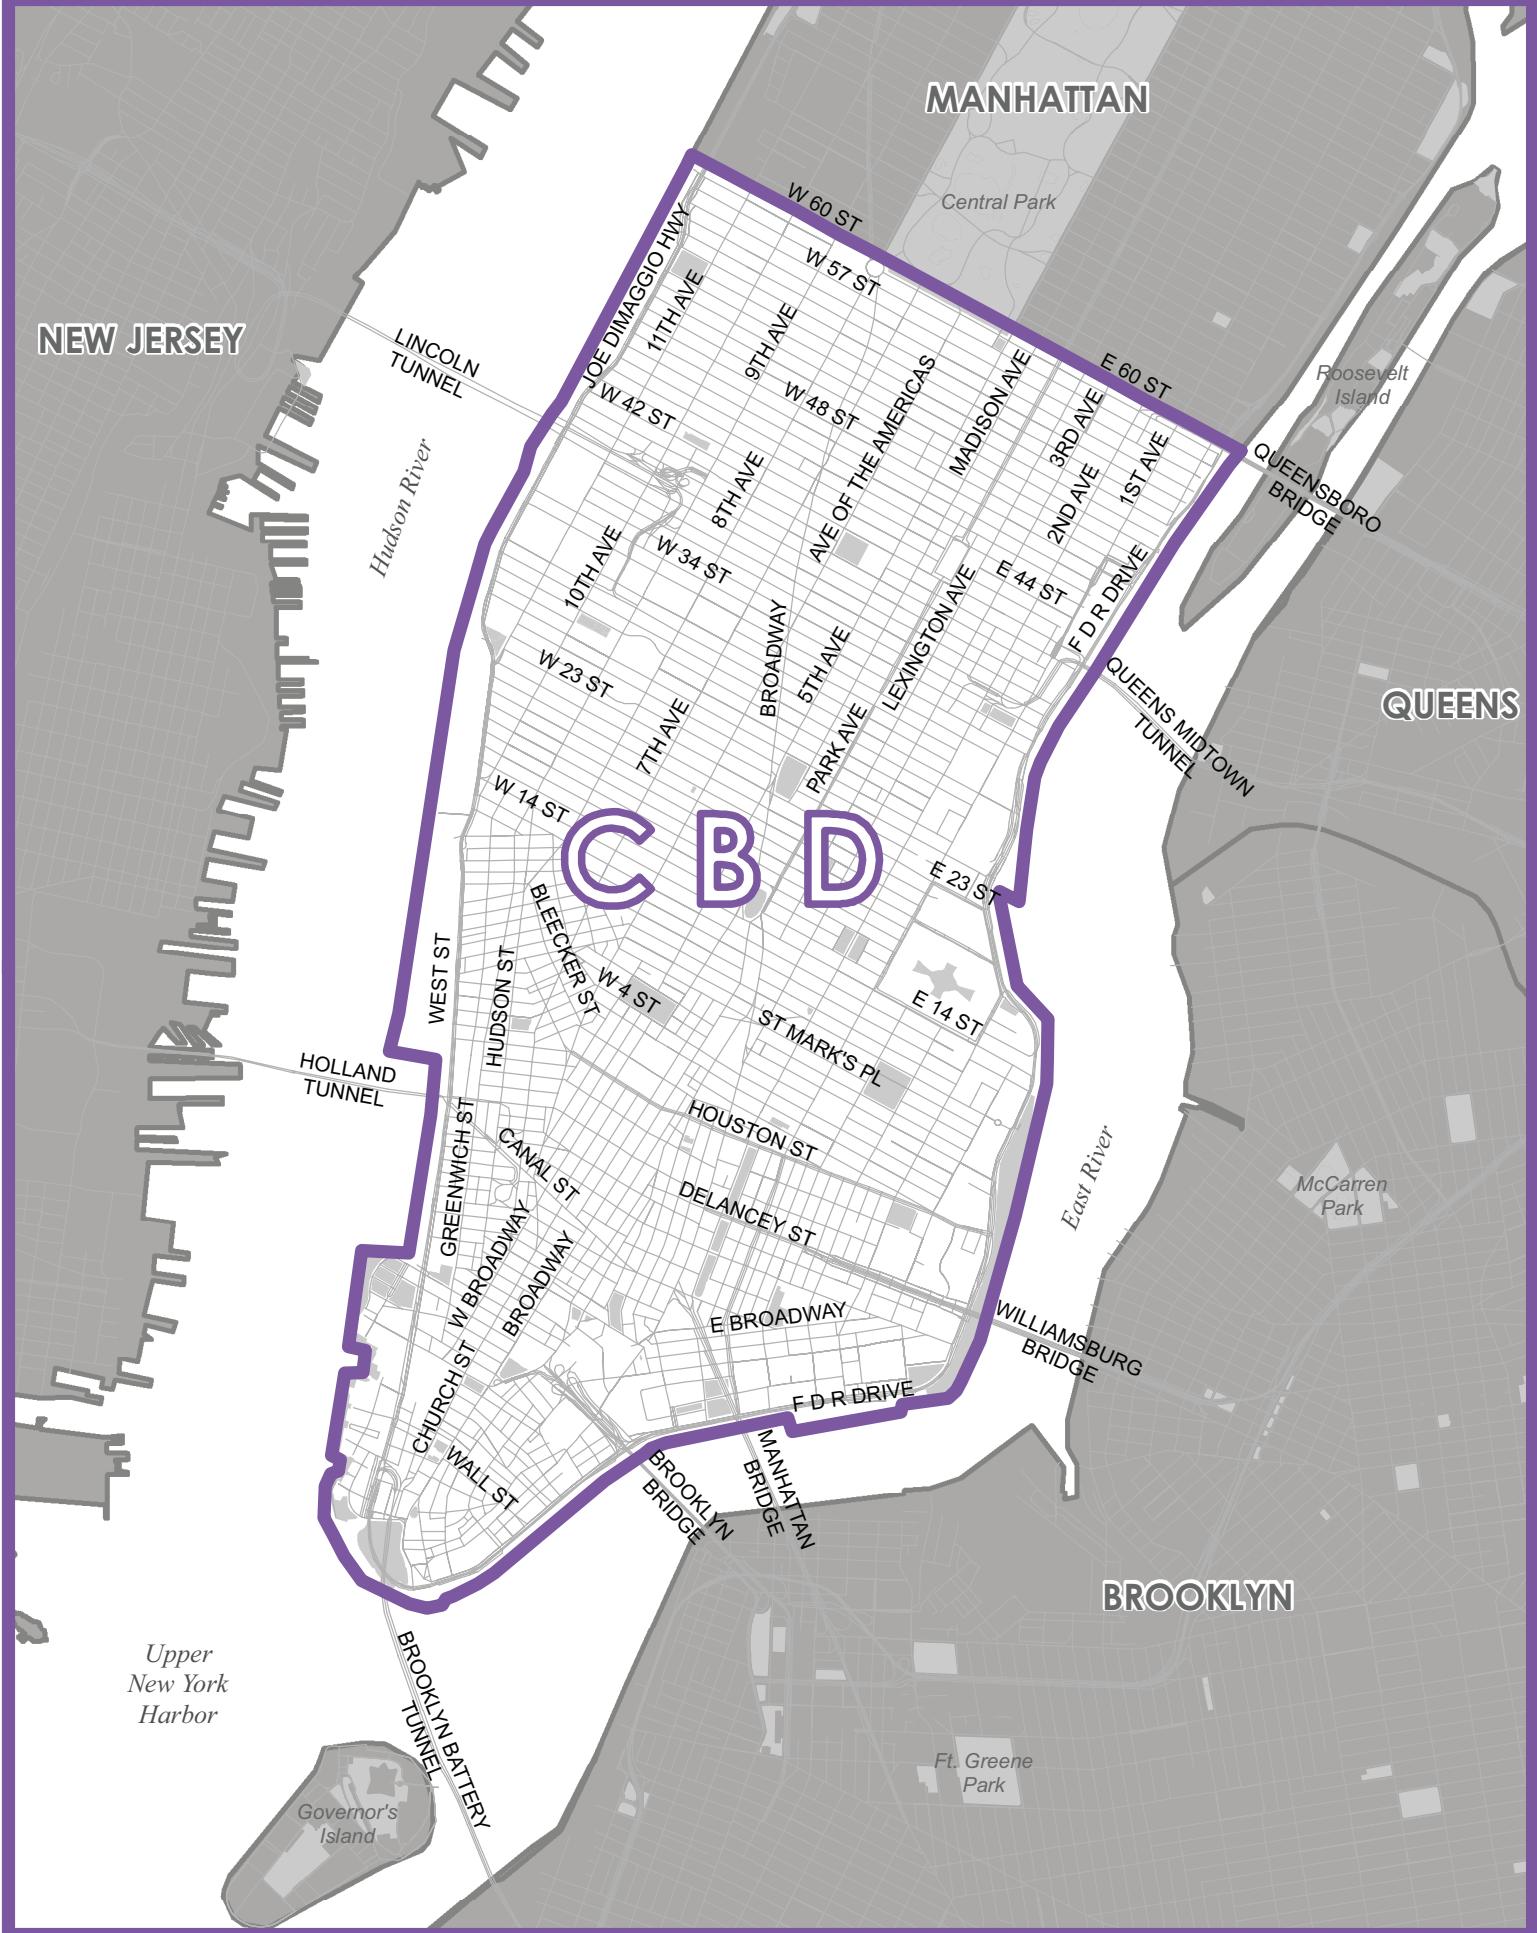

BMT

The **Brooklyn–Manhattan Transit Corporation (BMT)** was an urban transit holding company, based in Brooklyn, New York City, United States, and incorporated in 1923. The system was sold to the city in 1940. Today, together with the IND subway system, it forms the B Division of the modern New York City Subway.

PATH

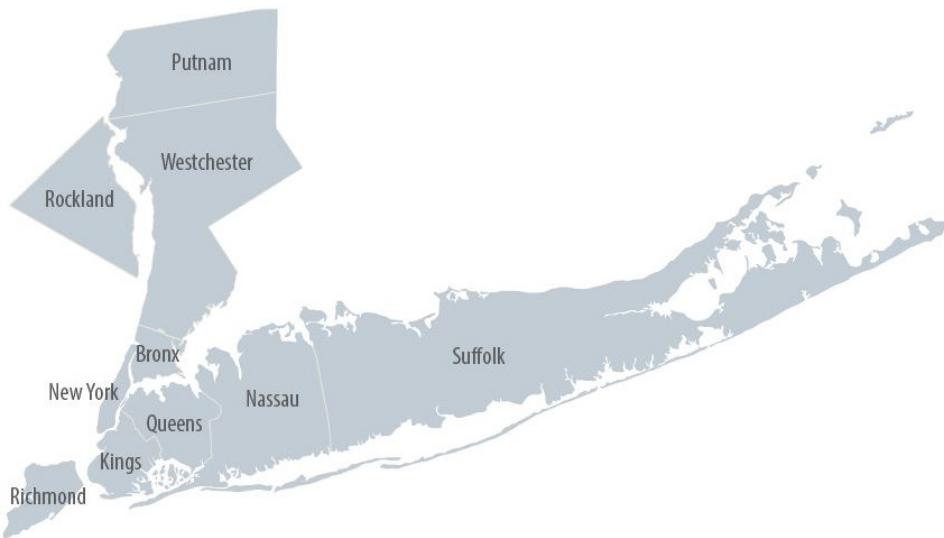

Port Authority Trans-Hudson, abbreviated **PATH**, is a rapid transit system serving Newark, Harrison, Hoboken, and Jersey City in metropolitan northern New Jersey, as well as lower and midtown Manhattan in New York City. The PATH is operated by, and named after, the Port Authority of New York and New Jersey.

MANHATTAN CENTRAL BUSINESS DISTRICT MAP

About NYMTC:

The New York Metropolitan Transportation Council (NYMTC) is a regional council of governments that is the metropolitan planning organization for New York City, Long Island and the Lower Hudson Valley. NYMTC provides a collaborative planning forum to address transportation-related issues, develop regional plans and make decisions on the use of federal transportation funds. The NYMTC planning area covers 2,440 square miles and includes a population of 12.4 million, which is approximately 64% of New York's population based on 2010 Census.

The New York Metropolitan Transportation Council (NYMTC) hereby gives public notice that it is the policy of the Council to assure full compliance with Title VI of the Civil Rights Act of 1964, the Civil Rights Restoration Act of 1987, Executive Order 12898 on Environmental Justice, and related statutes and regulations in all programs and activities. Title VI requires, and it is our policy, that no person in the United States of America shall, on the grounds of race, color, national origin, sex, age, or disability, be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which NYMTC receives federal financial assistance.

Any person who believes they have been aggrieved by an unlawful discriminatory practice under Title VI has a right to file a formal complaint. Any such complaint must be filed in writing or in person with NYMTC's Title VI Officer within one hundred eighty (180) days from the date of the alleged discriminatory act or upon notice of the discriminatory act. Title VI discrimination complaint forms may be obtained from the NYMTC website: www.nymtc.org or by calling 212-383-7200.

If information is needed in another language, contact 212-383-7200.

Data Availability:

- * The data contained in this report is available for download in Excel format at www.nymtc.org, under Data and Modeling.
- * The data can also be visualized using our web-application called Transportation Information Gateway (TIG) at www.tig.nymtc.org.
- * All the data presented in this report is provided by the relevant transportation agencies. Sources can be found on page IV-1, Appendix IV of this report.
- * Due to the loss of NYMTC's files and databases on Sept. 11, 2001, data for 1999 is largely absent. Some sources were able to provide limited data for that year.

Preface:

The 2017 Hub Bound Travel Data Report provides data and analysis on the numerous transportation services and facilities serving the “Hub” of the region, which includes the Manhattan Central Business District (CBD) (the lower portion of Manhattan from the northern boundary of 60th Street to the southern boundary of Battery Park). The report examines travel to and from the Hub by several modes: public transportation, private motor vehicle, and bicycle. The data presented in the report details entry to and exit from the Hub at specific facilities for each hour on a typical fall business day. For this analysis, most of the data were collected on a business day in October 18, 2017. Both vehicles travelled and persons travelled are shown for all public and private transportation modes. **The sectors shown in the tables (60th Street, Queens, Brooklyn, Staten Island and New Jersey) are strictly the entry and exit points in the Hub bound survey and are not necessarily the actual origins or destinations of trips.**

The Hub Bound Travel Data Report details total travel by mode, time of day, facility, and sector, providing transportation professionals and the general public with a valuable resource for defining the Hub’s transportation issues and predicting future demand on the transportation infrastructure. The time series analysis presented in Table 1A contains a useful comparison of current and previous years’ travel volumes.

The 2017 Hub Bound travel data in this report are shown in four appendices:

- * **Appendix I** presents historical information comparing volumes of travelers and vehicles, employment, population, transit levels of comfort (measured by average floor space per passenger) and the cumulative number of people and vehicles in the CBD;
- * **Appendix II** summarizes the peak hour and peak period figures in each travel mode by facility and sector level;
- * **Appendix III** provides detailed figures for each of the various travel modes addressed in this report. These tables show hourly volumes of travelers and vehicles. The figures are summarized by facility and sector;
- * **Appendix IV** lists the various public and private agencies that have jurisdiction over travel through the CBD gateways and have traditionally made their survey data available for this report.

History:

The first travel survey of the Manhattan Central Business District (CBD) was conducted and published by the Regional Plan Association in 1924. The report referred to the district as the “Hub,” reflecting the CBD’s unique role in the region’s economy. Subsequent surveys were conducted at eight-year intervals until 1963, when the Tri-State Regional Planning Commission assumed responsibility for the project, publishing it annually beginning in 1971. The New York Metropolitan Transportation Council (NYMTC) has sponsored the project and published the report since its inception in 1982.

HIGHLIGHTS

1. On a Fall business day in 2017, almost 3.9 million people entered Manhattan's Central Business District, 24.4 thousand or 0.6 percent fewer compared to a Fall business day in 2016.
2. Similar to the 2016 Hub Bound data counts, a total of 7.8 million persons entered and left the Manhattan Central Business District (CBD) on the survey day in 2017.
3. Approximately 37% of persons who entered the CBD did so during the peak period, from 7:00 am to 10:00 am (Table 3, Appendix I).
4. Approximately 5.9 million persons entered and left the CBD using public transportation in 2017 – about 10,000 or 0.2% less than those who used public transportation in 2016 (Table 5 in Appendix I).
5. The total number of people entering and leaving the Hub by autos, taxis, vans and trucks increased by almost 5,000 (to 1.82 million) since 2016 (Table 10, Appendix I).
6. MTA New York City Transit subways carried 82% of all rail passengers entering and leaving the CBD each day. About 51% of the subway passengers travelled during the morning (7:00 am to 10:00 am) and evening (4:00 pm to 7:00 pm) peak periods; the remaining 49% of all subway passengers travelled during the off-peak periods (Table in Appendix III on page III-17 and III-18).
7. About 84% of express bus passengers entering the CBD in 2017 came through Lincoln and Holland tunnels, while 16% of all express bus passengers came from other points of entry (Table 9, Appendix I).
8. About 44% of all private vehicles (autos, taxis, commuter vans and trucks) entering and leaving the CBD in 2017 did so via the 60th Street Sector (all avenues east and west of Central Park and including Central Park Drives). Brooklyn, Queens and New Jersey sectors accounted for about 25%, 18%, and 13% of the total number of private vehicles, respectively (Table 11, Appendix I).
9. Twenty-four percent of travelers crossing the CBD boundaries during the morning peak hours (7:00 am to 10:00 am) traveled counter to the predominant direction of travel. Of these reverse travelers, 61% traveled by subway. Overall morning reverse travel increased by less than 1% since 2016 (Table 12, Appendix I).
10. The heaviest hour for travel into the CBD in 2017 was 8:00 am to 9:00 am, during which time almost 616,000 persons entered the CBD. 65% of these travelers entered the CBD using the subway system while about 9% took private vehicles and almost 16% rode suburban rail (Table 24, Appendix II). The evening peak leaving the city saw about 491,000 persons leave the CBD between 5:00 pm and 6:00 pm; 61% of these travelers rode the subway, 11% took a private vehicle, and almost 16% traveled by regional rail (Table 25, Appendix II).
11. The total number of inbound and outbound ferry passengers was almost 126,000 on a fall business day in 2017. About 63% of these trips originated in Staten Island and 29% in New Jersey. The remaining 8 percent of ferry passengers came from the Brooklyn and Queens sectors (Table in Appendix III on page III-43).
12. Approximately 1% (or over 67,000) of total persons entering and leaving the Hub on a fall business day in 2017 used bicycles. This total increased by 5% since 2016. Most people (64%) entering and leaving the hub on bicycles came from north of 60th St, while 27%, 9% and 1% of all cyclists came from Brooklyn, Queens and Staten Island, respectively (Table in Appendix III on page III-44).

THE HUB OF THE REGION

Defined as that portion of Manhattan lying south of 60th Street, the Manhattan Central Business District (CBD) is the Hub of the Tri-State Region.

- * The most travelled routes in the region are those to the Hub.
- * Almost 2 million people were employed by the CBD in 2017.
- * There are significant numbers of commercial, educational and cultural activities for which the Manhattan CBD is renowned.

SECTORS OF ENTRY

People may enter the Central Business District of Manhattan (CBD or the Hub) through one of the following five gateways:

- * 60th Street Sector
- * Brooklyn Sector
- * Queens Sector
- * New Jersey Sector
- * Staten Island Sector

(CBD map, page ii)

People entering the CBD from 60th Street originate from upper Manhattan, the Bronx, counties to the north of New York City, from Connecticut, or may have crossed the George Washington Bridge from New Jersey.

Travel from the Brooklyn Sector, for the most part, may originate from the borough of Brooklyn itself; with the remainder of travelers originating from Staten Island, Queens, Nassau and Suffolk counties.

Travelers from the Queens Sector may originate from Queens, Nassau and Suffolk counties, as well as some arriving across the Whitestone and Throgs Neck bridges from the Bronx, Upstate New York and Connecticut.

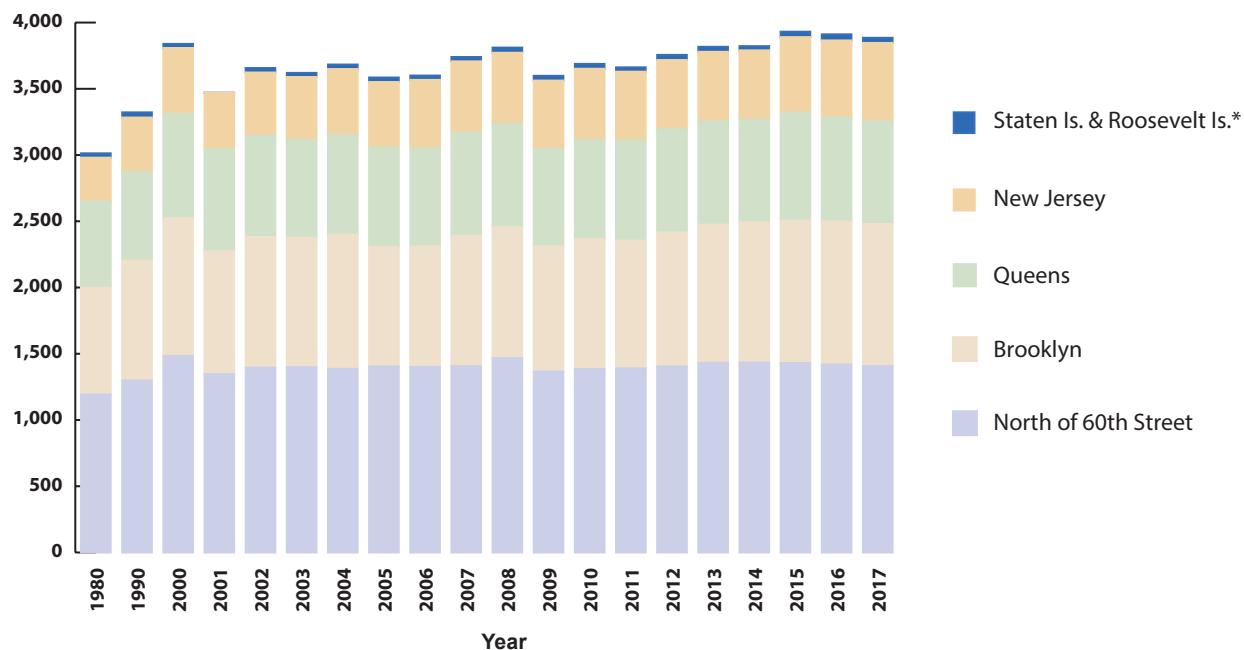

The New Jersey Sector provides access to the CBD via Lincoln and Holland Tunnels for the travelers coming predominantly from New Jersey, from points west of the Hudson River and some from Staten Island.

The Staten Island sector enters the Manhattan CBD via the Staten Island Ferry service, and is considered a separate clearly defined sector not encompassed in the above four sectors (CBD map, page ii)

CORDON CROSSINGS

Following are the numbers of travelers entering the Hub from each sector, across the cordon lines (CBD map, page ii) that cover the major entry points into the CBD (Figure 1):

FIGURE 1
TOTAL NUMBER OF PEOPLE ENTERING THE HUB
ON A FALL BUSINESS DAY
BY SECTOR

* Includes only Staten Island Ferry and Roosevelt Island Tramway passengers

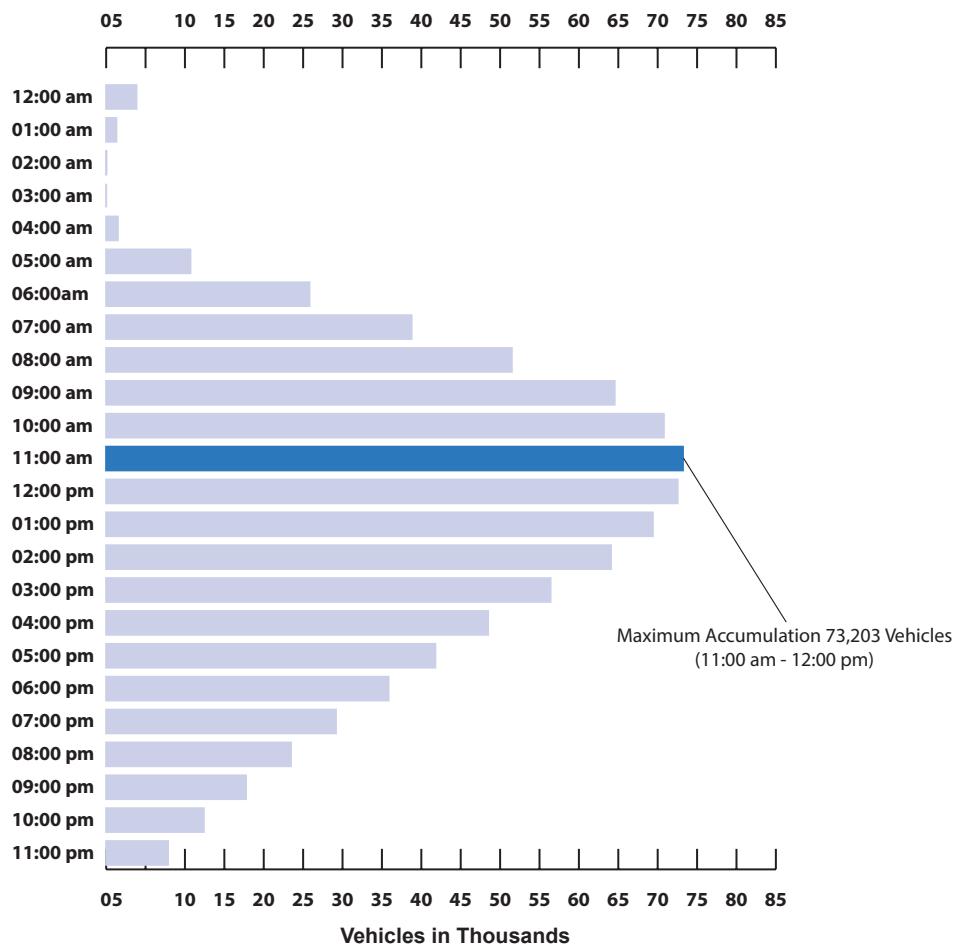

Sector of Entry	Number of Entries
60 th Street	1,407,051
Brooklyn	1,073,409
Queens	777,325
New Jersey	591,075
Staten Island	36,748
Total CBD Entry	3,885,608

This report also tracks the maximum net accumulation of persons in the Hub for all travel modes. This figure declined by 0.2% since 2016 to a maximum accumulation of almost 1.38 million travelers (Table 21B, Appendix II). The report also tracks the time that this maximum accumulation occurs. Typically, the number of persons accumulated in the Hub reaches a peak in the early afternoon, and 2017 was no exception.

The number of people travelling via public transportation increases significantly during morning (7:00 am to 10 am) and evening (4:00 pm to 7:00 pm) peak periods, while the share of auto use remains relatively constant

Maximum accumulation of over 73,000 vehicles occurred between 11:00 am - 12:00 pm in 2017, about 300 fewer than the year before (Figure 2 and Table 23B, Appendix II).

**FIGURE 2
HOURLY ACCUMULATION OF VEHICLES ON A FALL BUSINESS DAY
BY HOUR, IN 2017**

CHANGES IN HUB-BOUND TRAVEL

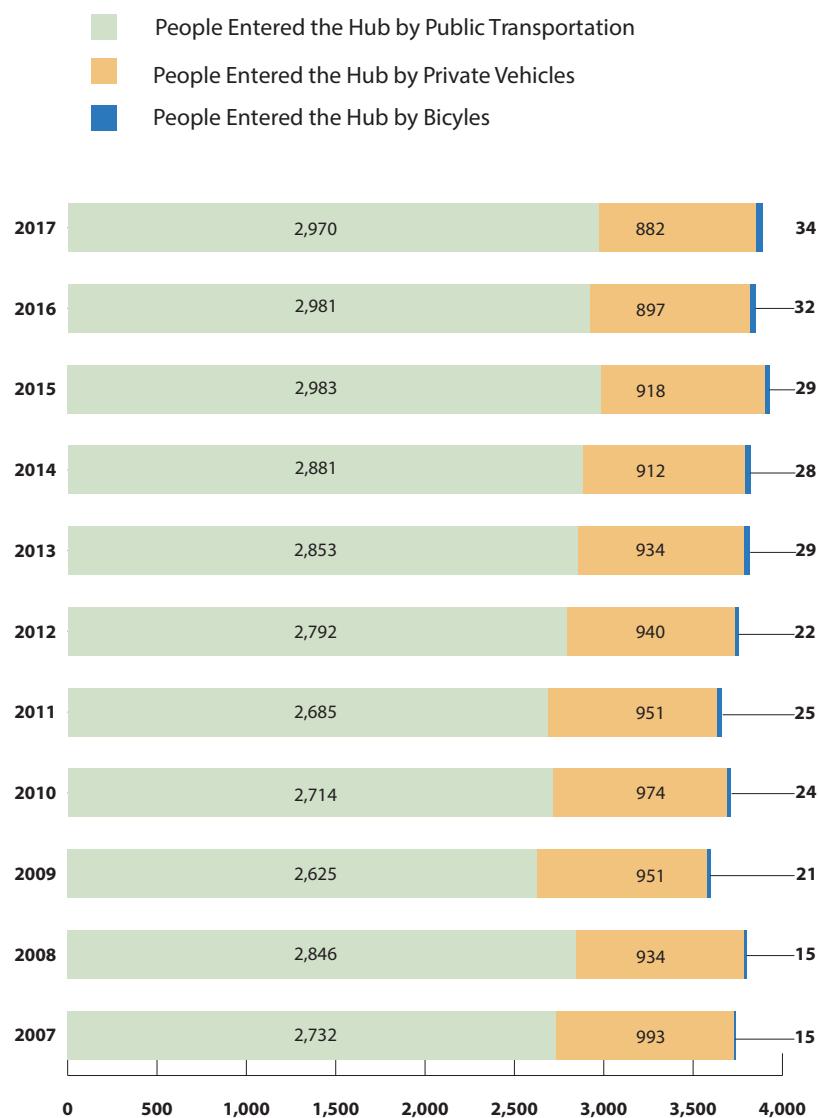

In 2017, 3.89 million people entered the Manhattan Central Business District (CBD) on a typical business day (Table 1A); a decrease of about 0.6% (over 24,000 people) since the 2016 total daily entry.

During the 10-year period between 2007 and 2017, the total number of people entering the CBD increased by almost 4%, to a peak of over 3.93 million in 2015, 3.91 million in 2016, and 3.89 million in 2017 (Table 1A, Appendix I).

PUBLIC TRANSPORTATION

Public transit continues to play a central role in meeting regional travel needs despite minor declines in usage. Trips to the Hub made by all modes of public transportation decreased by 0.4% since 2016. Round trips made by the same modes of public transportation decreased by 0.2% since 2016, but increased by almost 10% during the decade between 2007 and 2017 (Figure 3 and Table 22A, Appendix II).

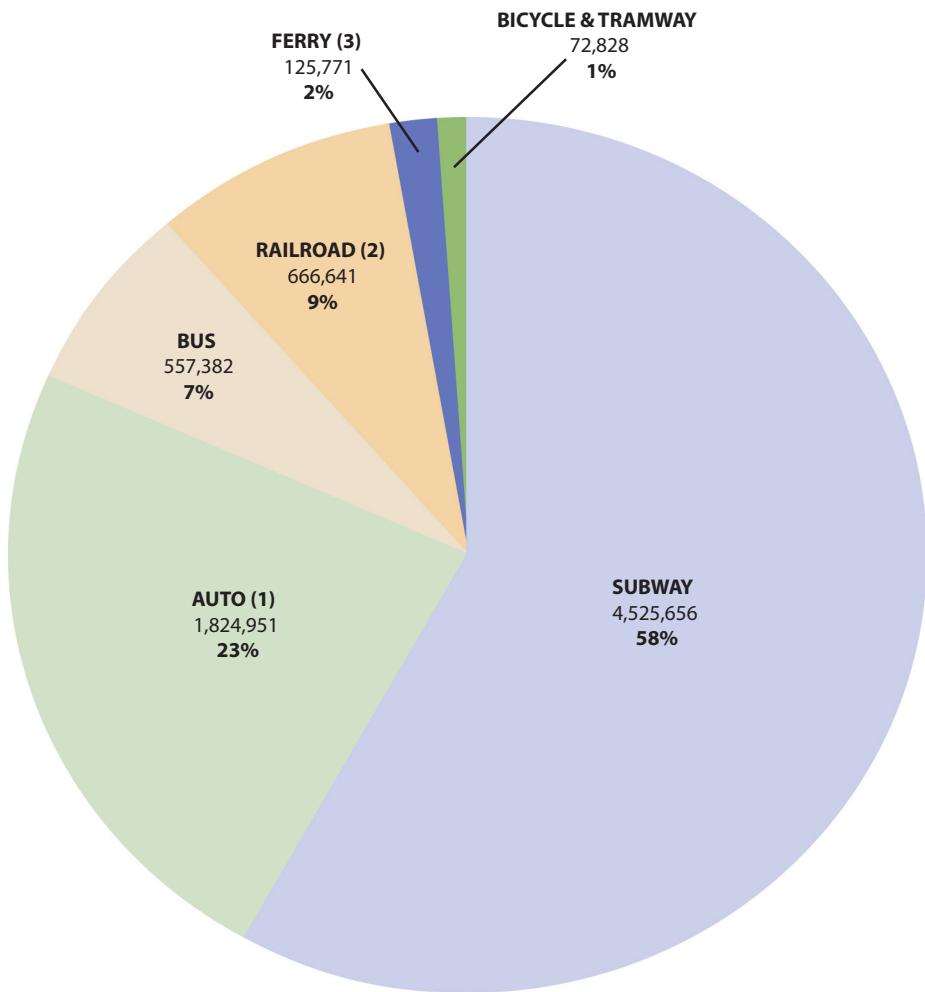

FIGURE 3
TOTAL NUMBER OF PEOPLE ENTERING THE HUB
ON A FALL BUSINESS DAY
IN THOUSANDS

Bus ridership increased by 0.3 percent in 2017. The subway transported about 0.3% less passengers (entering and leaving the Hub) than in 2016 (Table 5). Downtown and Uptown PATH carried over 6% more passengers than in 2016. Suburban and intercity rail services carried 0.1% or about 1,000 fewer passengers than a year ago at the

same time (Table 5). The relative amount of subway, railroad, and bus passengers reached 58%, 9%, and 7% relatively of all passengers entering and leaving the Hub in 2017 (Figure 4).

FIGURE 4
TOTAL NUMBER OF PEOPLE ENTERING and LEAVING THE HUB
ON A FALL BUSINESS DAY, IN 2017
BY MODE

- (1) Includes: Autos, Taxis, Commuter Vans, and Trucks
- (2) Suburban and Intercity Rail Transit (such as NJ Transit; AMTRAK; LIRR)
- (3) Excludes Bicyclists on Si Ferry

Trips via ferries (both publicly and privately operated) increased by about 3% in 2017 compared with 2016. Roosevelt Island Tramway ridership decreased substantially by 40% or almost 3,700 persons, daily (Table 5). Approximately 93% of all bus passengers traveled into the Hub by express buses and more than three quarter of all bus passengers commuted from New Jersey (Table 9, Appendix I).

PRIVATE TRANSPORTATION

In 2017, private transportation brought about 24% of all persons into the CBD. This is a decline of about 2% or 15,000 travelers since 2016. The total number of people entering and leaving the Hub by private vehicles increased by 0.3 percent or about 4,700 persons on a typical business day in 2017 compared with 2016. The largest part of this increase (with absolute volume of over 8,600 travelers) came from vehicles crossing to and from the Queens Sector. Only the 60th Street Sector experienced a decrease (1% or about 8,100) in the number of people entering and leaving the Hub in the same time period (Table 10, Appendix I).

There were approximately 67,300 daily bicycle trips to and from the CBD in 2017, about 5% increase since 2016 (Table on page III-44).

MODE OF TRAVEL

Travelers entering the CBD may choose from a wide variety of public or private forms of transportation. Depending on origin, destination and preference, options include:

- * Subway
- * Bus
- * Suburban Rail
- * Intercity Rail
- * Ferry
- * Tramway
- * Motor Vehicle
- * Bicycle

Share of travel modes is shown in Figure 4, page 9.

This report does not include data on people arriving by foot, air, private cruise or commercial ships in the CBD.

Subway service is provided by the MTA New York City Transit and by Port Authority Trans-Hudson (PATH) systems.

Bus service is provided on local and express routes by MTA New York City Transit and on express routes by MTA Bus Company, New Jersey Transit, Westchester County Bee-Line, and by private operators outside of the five boroughs of New York City.

Suburban rail service is provided by MTA Metro North Railroad, MTA Long Island Rail Road, and by New Jersey Transit.

Intercity rail service is offered by Amtrak to destinations such as Boston, Philadelphia, Washington DC, and Albany.

Ferry service is provided by the following ferry operators:

- * Staten Island Ferry
- * NY Waterway
- * Hornblower

- * NY Water Taxi and Circle Line Downtown
- * Liberty Landing Ferry
- * Seastreak Ferry

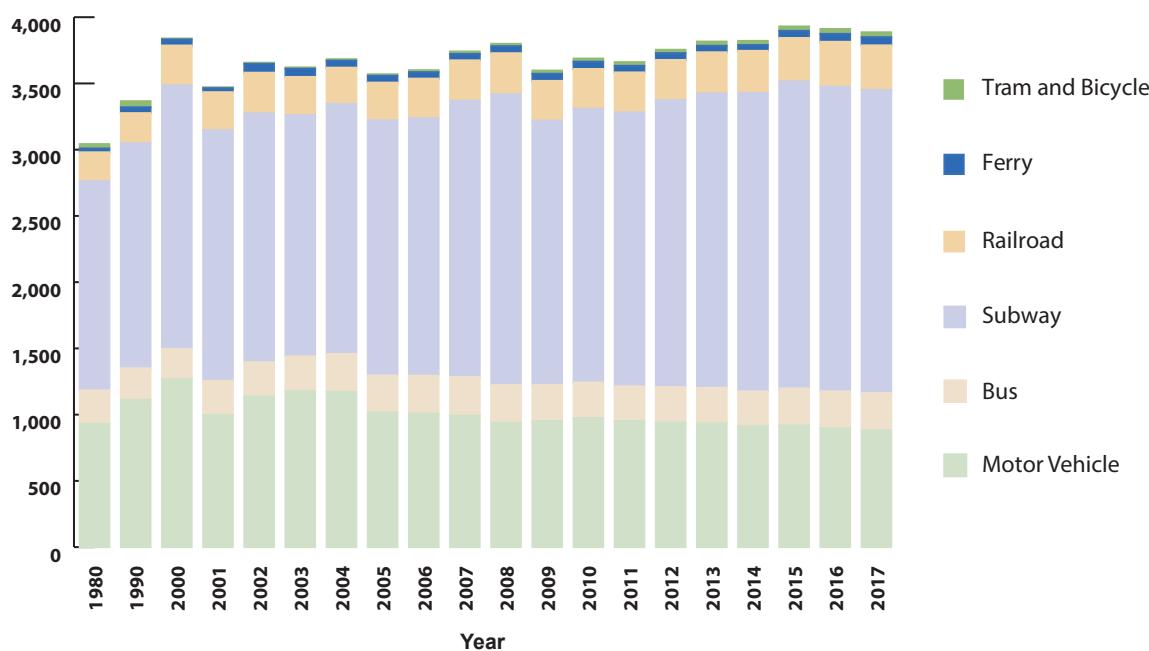

Tramway service is provided by Roosevelt Island Operating Corporation.

Motor vehicles include private autos, taxis, and private and commercial vans and trucks. This also includes livery service vehicles and commuter vanpools.

A. Subway

The subway system continued to be the most popular mode of public transportation in 2017, transporting a daily average of almost 2.3 million passengers into the Hub (0.5% fewer than last year). This number of commuters however increased by almost 10% in a decade period since 2007. In 2017, the subway system transported 12,000 fewer passengers entering and leaving the Hub compared with 2016 (Figure 5 and Table 1A, Appendix I).

FIGURE 5
TOTAL NUMBER OF PEOPLE ENTERING THE HUB
ON A FALL BUSINESS DAY
BY MODE

B. Bus

Bus service into the Hub is provided primarily by the Metropolitan Transportation Authority (MTA) through its sub-agencies: New York City Transit (NYCT) and MTA Bus Company.

NYCT operates nearly all local bus routes in and through the Hub, as well as numerous express routes to and from the outer boroughs. The MTA Bus Company also provides service on express routes in and out of the Hub. This report organizes bus ridership based on the point of entry into the Hub, and not by originating location. In 2017, buses brought over 282,000 passengers daily into the Hub. Bus riders from New Jersey riding on express buses accounted for 78% (or about 220,000) of all bus passengers entering the Hub on a typical business day in 2017.

In general, the proportions of passengers in express buses far exceeds local buses in most of the individual CBD sectors. In particular, 100% of New Jersey bus riders enter the Hub using express buses. Similarly, from the Brooklyn Sector, 99% of bus commuters are express bus passengers, and 85% of Queens Sector bus commuters are also express bus passengers. Conversely, only 38% of all bus passengers entering the Hub via the 60th Street Sector are express bus commuters, with the remaining 62% of this sector's bus riders using local buses to enter the CBD in Manhattan (Figure 13, page 19 and Table 18, Appendix II).

C. Suburban and Intercity Rail

Commuter and Intercity rail trains brought over 336,000 passengers into the CBD on the survey date, a total of about 11% of all public transit passengers. That is a 9% share of all persons entering the Hub daily. In 2017, though this mode experienced a decrease in ridership of about 2,300 passengers (due to a 5% decline of New Jersey Sector commuters using this mode), it continues to be the third most prevalent mode of entry into the Hub after the subway and private vehicles (Table 14 C, Appendix II).

D. Ferry and Tramway

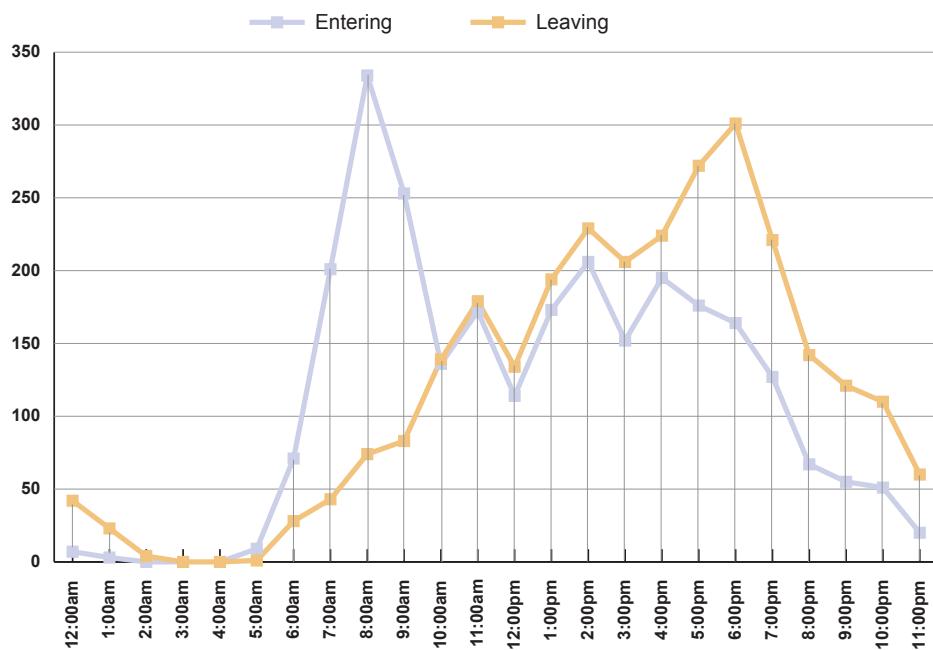

Hub Bound ferry travel via the Staten Island Sector reached approximately 37,000 inbound passengers in 2017, a decrease of about 11 percent since 2016. At the same time, the total of all private ferry passengers entering the Hub increased by 35% or about 6,600 persons, due to the introduction of new ferry routes.

Roosevelt Island Tramway reported a decrease in inbound passengers of about 2,700 persons or 41% compared with 2016 (Figures 6–7 and Table on page III-43).

E. Motor Vehicles

Since the first Hub Bound Survey in 1924, private motor vehicles including autos, taxis, vans and trucks have been the second most common mode of transportation behind the subway system. In 2017, 882,000 persons entered the Hub using private motor vehicles. This represents a decrease of over 15,000 or about 2% passengers compared with 2016. The most significant decline (over 18,000 or almost 5%) in the number of motor vehicle riders was observed in the 60th Street sector. Correspondingly, the share of travelers arriving from Queens by private vehicles dropped by 2% or 3,400 riders of this mode in 2017. At the same time, Brooklyn and New Jersey sectors experienced an increase of about 2% in private motor vehicle riders entering the Hub on a typical business day in 2017 (Figure 8; Figure 13, page 19 and Table 14 C, Appendix II).

FIGURE 8
PRIVATE VEHICLES ENTERING and LEAVING THE HUB
ON A FALL BUSINESS DAY
BY YEAR

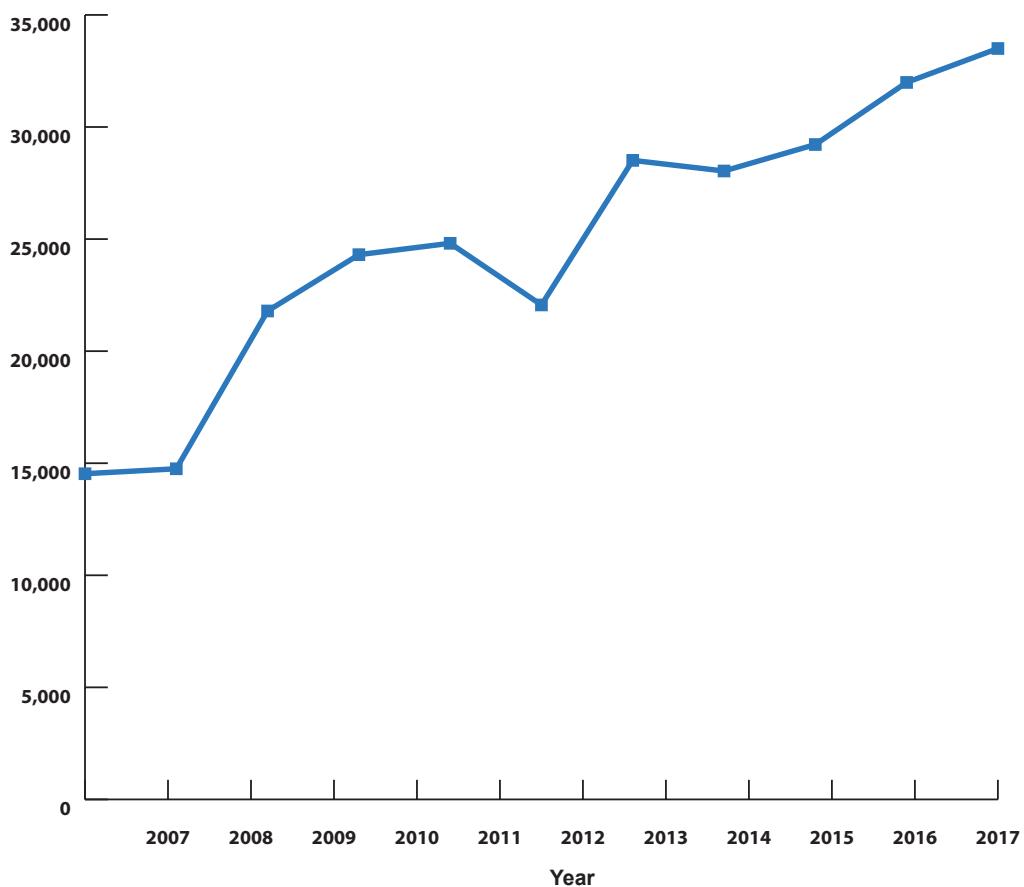

F. Bicycle

In 2017, survey data provided by the New York City Department of Transportation showed approximately 33,500 bicyclists entering the Hub on a typical fall business day. This shows an increase of nearly 1,500 riders from 2016. The most active entry point to the Hub is the 60th Street Sector, generating over 21,000 riders

or 64% of all bicyclists entering the Hub daily in 2017. Approximately 9,000 bicyclists crossed the Brooklyn, Manhattan, and Williamsburg bridges from Brooklyn, while around 2,900 rode from Queens across the Ed Koch Queensboro Bridge. Bicyclists on trafficked roads were counted riding either with or against the flow of traffic (Figure 9 and Table on page III-44).

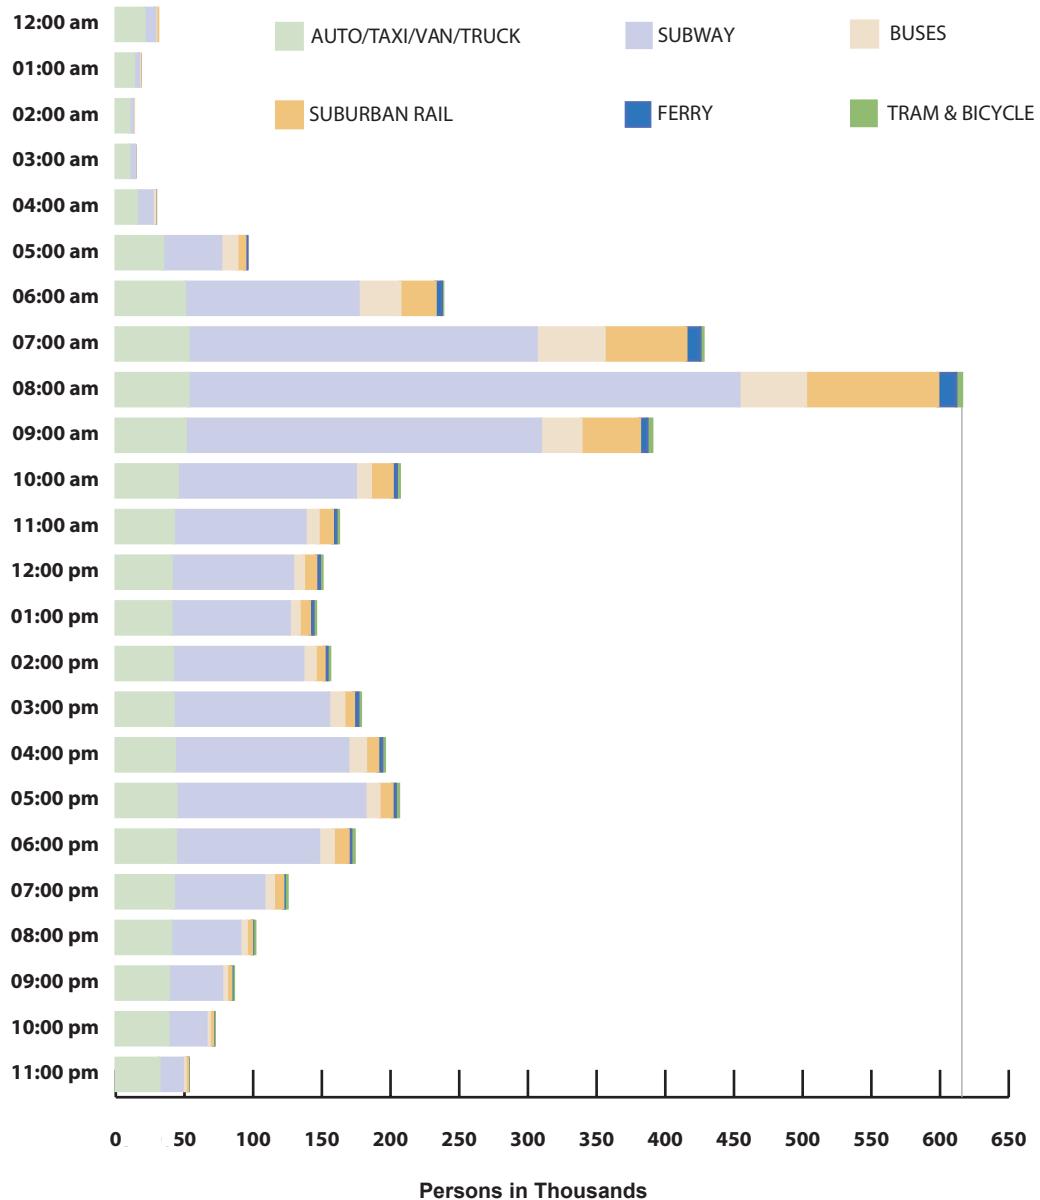

FIGURE 9
**BICYCLISTS ENTERING THE HUB
ON A FALL BUSINESS DAY
BY YEAR**

TIME OF ENTRY

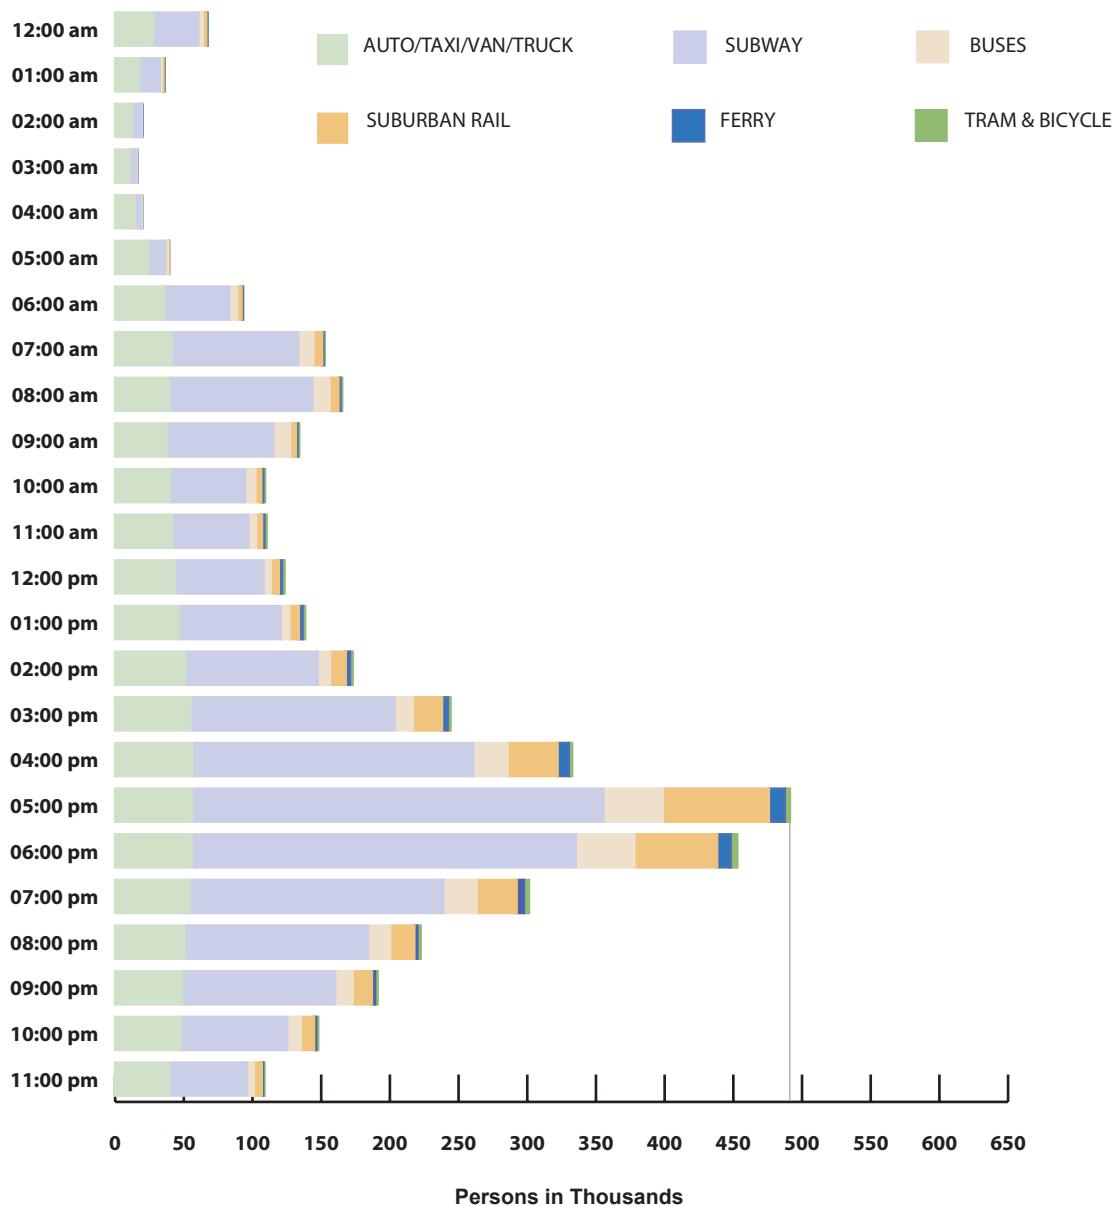

The total number of persons entering the CBD in 2017 during the morning peak hour of 8:00 am to 9:00 am was about 616,000; and during the morning peak period of 7:00 am to 10 am was about 1,434,000. This represented 16% and 37% of the total daily volume, respectively (Figure 10 and Tables 14A-14B, Appendix II).

FIGURE 10
TOTAL NUMBER OF PEOPLE ENTERING THE HUB
ON A FALL BUSINESS DAY, IN 2017
BY HOUR, BY MODE

The peak afternoon hour of 5:00 pm to 6:00 pm recorded over 491,000 people leaving the Hub while the peak period of 4:00 pm to 7:00 pm recorded about 1,277,000 persons leaving the Hub by all modes. This represented 13% and 33% of the total daily volume, respectively (Figure 11 and Tables 15A - 15B, Appendix II).

FIGURE 11
TOTAL NUMBER OF PEOPLE LEAVING THE HUB
ON A FALL BUSINESS DAY, IN 2017
BY HOUR, BY MODE

Use of private vehicles to travel to the Hub had the highest volume at 7:00 am while the highest traffic in the afternoon was between 3:00 pm to 7:00 pm for outbound direction (Figures 12 and Table 23A, Appendix II).

* NYMTC estimate.

- 2014-2017 Employment data have been revised due to some changes in estimate's methodology and therefore it may not be comparable with previous years.

- The three Connecticut counties include New Haven, Fairfield, and Litchfield.

- The nine New Jersey counties include Bergen, Essex, Hudson, Middlesex, Monmouth, Morris, Passaic, Somerset and Union.

- The seven suburban counties of New York include Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk and Westchester.

1. Majority of buses crossing at the 60th Street, Brooklyn, and Queens sectors belong to MTA NYCT, MTA Bus Co., and Westchester Bee Line. These bus volumes are derived from schedule and only these buses are included at the crossings.
2. Buses crossing NJ Sector were counted at the toll facilities which include all the buses.
3. New Jersey bus occupancy counts were determined based on Port Authority of NY&NJ bus traffic counts and on the occupancy rates from PANY&NJ 2015 Continuous Bus Survey.
4. Due to rounding, numbers presented throughout this table may not add up precisely to the totals provided by the data sources.

(1) Westbound counts data from PANY&NJ October 2015 Classification Report

Note: New Jersey bus occupancy counts were determined based on Port Authority of NY&NJ bus traffic counts and on the occupancy rates from PANY&NJ 2015 Continuous Bus Survey.

Due to rounding, numbers presented throughout this table may not add up precisely to the totals provided by the data sources.

Notes:

- Majority of buses crossing at the 60th Street, Brooklyn, and Queens sectors, belong to MTA NYCT, MTA Bus Co., and Westchester Bee Line. These bus volumes are derived from schedule and only these buses are included at the crossings.
- Buses crossing NJ Sector were counted at the toll facilities which include all the buses.
- New Jersey bus occupancy counts were determined based on Port Authority of NY&NJ bus traffic counts and on the occupancy rates from PANY&NJ 2015 Continuous Bus Survey.
- Due to rounding, numbers presented throughout this table may not add up precisely to the totals provided by the data sources.

* Central Park South and 7th Avenue, open for high occupancy vehicles (HOVs) only: Monday to Friday, 8 AM to 10 AM

Note: Volumes for the four East River bridges, and for the 60th Street screenline, are provided by the New York City Department of Transportation (NYC DOT). These volumes are obtained using Automatic Traffic Recorders (ATRs), which record each vehicle as it passes over a pneumatic tube. A total of 40 ATRs are deployed simultaneously during the two-week counting period in October. All ATR machines and tubes are maintained daily. Nevertheless, it is not possible to obtain valid data from all 40 ATRs for any specific continuous 24-hour period. This is due to a number of factors, notably vehicles parked on pneumatic tubes, breakage of pneumatic tubes, ATR damage and battery depletion, unusual circumstances disrupting traffic flow (accidents, fires, police actions, etc.). As a result, it is necessary to use the average of valid data from each individual ATR to develop representative traffic counts at all locations. The Hub Bound report data reported for other facilities is generally collected on a typical fall day (i.e., October 18, 2017). Thus, there may be some variation in this report and the reports produced by NYC DOT.

Nevertheless, it is not possible to obtain valid data from all 40 ATRs for any specific continuous 24-hour period. This is due to a number of factors, notably vehicles parked on pneumatic tubes, breakage of pneumatic tubes, ATR damage and battery depletion, unusual circumstances disrupting traffic flow (accidents, fires, police actions, etc.). As a result, it is necessary to use the average of valid data from each individual ATR to develop representative traffic counts at all locations. The Hub Bound report data reported for other facilities is generally collected on a typical fall day (i.e., October 18, 2017). Thus, there may be some variation in this report and the reports produced by NYC DOT.

Note: Volumes for the four East River bridges, and for the 60th Street screenline, are provided by the New York City Department of Transportation (NYC DOT). These volumes are obtained using Automatic Traffic Recorders (ATRs), which record each vehicle as it passes over a pneumatic tube. A total of 40 ATRs are deployed simultaneously during the two-week counting period in October. All ATR machines and tubes are maintained daily. Nevertheless, it is not possible to obtain valid data from all 40 ATRs for any specific continuous 24-hour period. This is due to a number of factors, notably vehicles parked on pneumatic tubes, breakage of pneumatic tubes, ATR damage and battery depletion, unusual circumstances disrupting traffic flow (accidents, fires, police actions, etc.). As a result, it is necessary to use the average of valid data from each individual ATR to develop representative traffic counts at all locations. The Hub Bound report data reported for other facilities is generally collected on a typical fall day (i.e., October 18, 2017). Thus, there may be some variation in this report and the reports produced by NYC DOT.

Appendix IV

List of Data Sources - 2017

This page is intentionally left blank

LIST OF DATA SOURCES

The Hub Bound Travel Report measures hourly numbers of persons and vehicles entering and leaving the Manhattan Central Business District (CBD) by mode around the clock. The count day is preferably a Wednesday in October, which is considered to be an average weekday in an average month. This report would not be possible without the help of various transportation agencies providing NYMTC with travel data.

Rail Rapid Transit

This information is generated from:

- * MTA New York City Transit (MTA NYCT) Automated Fare Collection (AFC) system entry swipes.
- * Port Authority Trans Hudson (PATH): turnstile entrance and exit registration.

Bus Transit

This information is generated from:

- * MTA New York City Transit: passenger counts (swiping data).
- * MTA Bus Company: passenger counts (swiping data).
- * Port Authority of New York & New Jersey (PANYNJ): EZ Pass for vehicle volumes, and average vehicle occupancy rates.
- * New York City Department of Transportation (NYCDOT): passenger counts (swiping data).
- * Westchester County Department of Transportation - Bee Line: passenger counts (swiping data).

Suburban Rail Transit

This information is generated from:

- * MTA Long Island Rail Road (MTA LIRR): on-board passenger counts.
- * New Jersey Transit Corporation (NJ Transit): passenger counts on the trains.
- * MTA Metro-North Railroad Planning Department - exit/entrance counts at Grand Central Terminal.
- * National Railroad Passenger Corporation (AMTRAK): fare collection.

Ferry Transit

This information is generated from:

- * For the Staten Island Ferry - NYCDOT Ferry Division: turnstile
- * For private ferry ridership – NYCDOT Ferry Division: passenger counts, fare collection.
- * The Port Authority of NY&NJ - Ferry Transportation: passenger counts, fare collection.
- * New York Water Taxi and Circle Line Downtown: passenger counts, fare collection.
- * New York Waterway - Information System Support: passenger counts, fare collection.
- * Seastreak Ferry: passenger counts, fare collection.
- * Liberty Landing Ferry: passenger counts, fare collection.
- * NYC Ferry by Hornblower, fare collection.

Aerial Tramway

This information is generated from:

- * Roosevelt Island Operating Corporation of the State of New York: turnstile and gate volumes.

Bicycle

This information is generated from:

- * NYCDOT: Staten Island Ferry, bridge crossings, and 50th Street Screen Lines.

Motor Vehicles

This information is generated from:

- * NYCDOT: tube counts across 60th Street and East River non-toll bridges.
- * MTA Bridges and Tunnel East River toll facilities, fare collection.
- * Port Authority Hudson River toll facilities, fare collection.
