ADDENDUM

TO

2019 HUB BOUND TRAVEL DATA

April 2021

This page is intentionally left blank

This addendum rectifies the bidirectional Brooklyn Bridge traffic counts for the 2019 Hub Bound Travel Data

On February 16, 2021, the New York City Department of Transportation (NYCDOT) provided additional Brooklyn Bridge traffic count data that was collected as part of the NYBPM Data Collection in November 2019.

According to NYCDOT, the VCC (Vehicle Classification Counts) data more accurately represents traffic volumes across the Brooklyn Bridge in comparison to the October 2019 Automatic Traffic Recorder (ATR) volume data that was included in the 2019 Hub Bound Travel Data Report. See the Brooklyn Bridge VCC data in the table below.

Please note the following:

1. The VCC data in the table below **are not updated in the 2019 Hub Bound Travel Data Report**, that was published in December 2020. Please use your own discretion when using the older volumes in the 2019 Hub Bound Travel Data Report for any analysis.

2. The VCC volumes were collected with a camera and then a manual count was obtained from 24 hours of video. This represents a change in the collection methodology for the Brooklyn Bridge counts historically presented in the Hub Bound Travel Data reports. Please use discretion in making historical comparisons.

AUTOS, TAXIS, COMMUTER VANS AND TRUCKS

NOVEMBER 2019 INBOUND and OUTBOUND COUNTS

HOURS	INBOUND BROOKLYN BRIDGE	OUTBOUND BROOKLYN BRIDGE
12:00am	1,235	2,382
1:00am	744	1,366
2:00am	533	837
3:00am	606	599
4:00am	1,289	817
5:00am	2,770	1,573
6:00am	3,928	2,487
7:00am	3,662	2,683
8:00am	3,248	2,768
9:00am	3,188	2,823
10:00am	2,993	2,807
11:00am	2,746	2,694
12:00pm	2,974	2,719
1:00pm	2,902	2,653
2:00pm	3,103	2,708
3:00pm	3,183	2,615
4:00pm	3,219	2,265
5:00pm	3,314	2,497
6:00pm	3,456	2,914
7:00pm	3,455	2,967
8:00pm	3,371	2,995
9:00pm	3,479	3,113
10:00pm	3,012	2,925
11:00pm	2,150	2,736
TOTAL	**64,560**	**56,943**
